EXPERIENCE

T-Mobile - UX Designer/Software Developer
3/2020 – Present

In addition to below, also began leading development projects within team and creating documentation for others to follow regarding branding guidelines within the team. Leads team design vision on all internal projects with wireframes and prototypes and collects user data to make informed design decisions.

T-Mobile – Junior UX Designer/Software Developer
11/2018 – 3/2020

In addition to below, began designing and implementing mobile applications with React Native. Took on greater responsibilities with representing team in larger cross-team settings and became driving force for internal team's branding implementation.

T-Mobile - UX Designer/Software Developer (Contract)
7/2017 – 11/2018

Created visual mock-ups and wireframes for web applications. Worked with a constantly changing and diverse team of engineers, designers, and programmers to create new applications. Implemented highly interactive and responsive web pages based on designs that conform to T-Mobile branding guidelines.
